EAST BAY REGIONAL PARK DISTRICT

INTER-DEPARTMENTAL CORRESPONDENCE

DATE: June 12, 1989

TO: Operations, Public Safety, Field Manager,
Park Supervisor, Planning, Design, Land Stewardship

FROM: Linda Prat

SUBJECT: **PARK/TRAIL**: Diablo Foothills Regional Park

We have recently acquired the following property:

Property Name: Stonegate Subdivision (Bogue Ranch)

Acreage: 259.46 acres

Location: This property is located in Alamo, west of Diablo Foothills, south of Walnut Creek Open Space, nearly surrounding the Stonegate Subdivision. This acquisition includes open space, trails and staging area. The staging area located off Livorna Road East is the only formal public access the District is to own and maintain. EBRPD is committed to signing the staging area. Note that there is another trail that begins across the street from the staging area and continues around the flood control detention basin and into the southerly part of the dedication. This trail is dedicated to R7-A; EBRPD is not to be involved with this trail.

There are four separate emergency vehicle and maintenance access gates (EVMA) within the project (see map attached). It is important to note that these are not for public use, but are only for the use of local property owners. (The streets within the subdivision are private.)

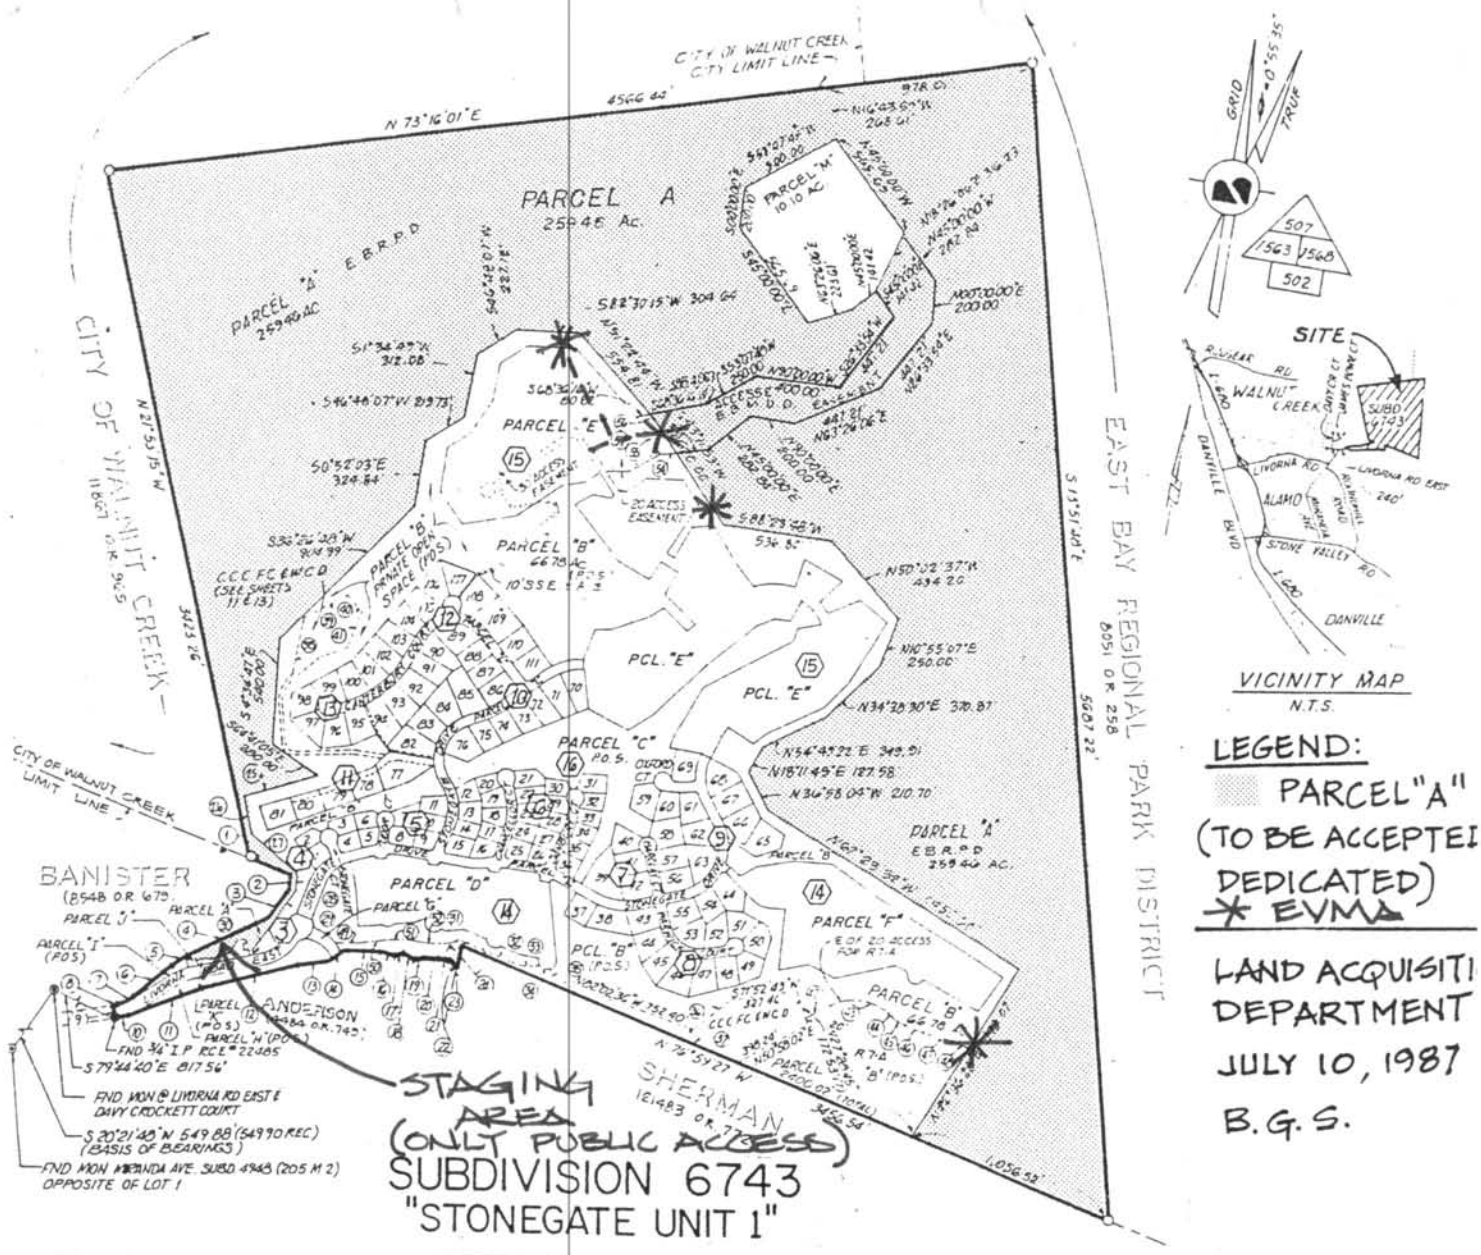

Ray Budzinski is dealing with the grazing and fencing issues.

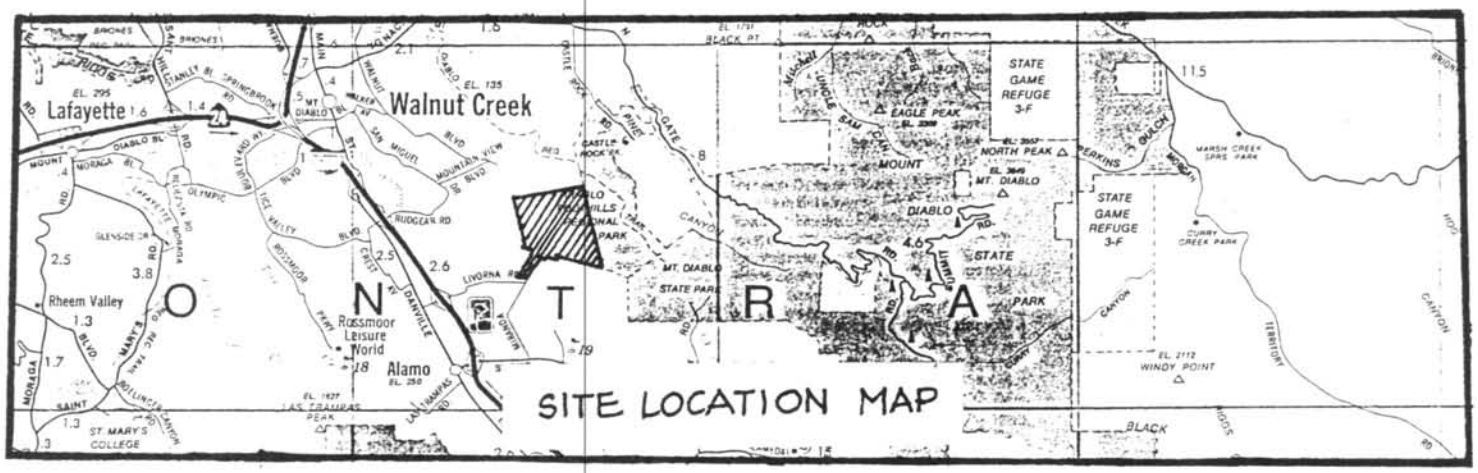

We are now trying to create a maintenance agreement for the westerly portion of the property, to be entered into with the City of Walnut Creek. This will be put before the Board shortly.

The trail leaving the staging area needs to be developed. It is all grass now.

This notification is to inform you this land is now owned by EBRPD. You can now secure the property and add it to the operation of the park.
